Diagram illustrating the iterative process of finding the minimum number of coins for a target amount. It shows three rows, each representing a step in the process. Each row has a sequence of vertical bars (representing coins) and a "por" (for) label. Below the bars, the word "Pagamentos" (Payments) is written, followed by a "#" symbol. To the right of the "#" symbol, a grid of squares represents the number of coins used for each amount. The first row shows the initial state with 1 coin for amounts 1-4 and 0 coins for amounts 5-10. The second row shows the state after adding 2 coins, with 2 coins for amounts 1-4 and 1 coin for amounts 5-6. The third row shows the state after adding 5 coins, with 5 coins for amounts 1-4 and 2 coins for amounts 5-6.
